DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to teach a combination of the steps of:
a plurality of conversion processors, wherein each conversion processor is configured to modulate a communication signal provided by a user application to create an interim modulated signal, analyze the interim modulated signal to determine a type of communication signal and to route the analyzed interim modulated signal according to the type of communication signal, and demodulate the routed interim modulated to create a secondary original signal based on the type of communication signal, wherein secondary original signals of multiple user applications can be assigned to a channel, in the specific combination as recited in the claim.

Regarding claim 13, the prior art fails to teach a combination of the steps of:
demodulating the interim modulated signal with a demodulator having a path set to correspond with the determined type of communication signal, wherein a channel can simultaneously transmit demodulated signals of more than one user application, in the specific combination as recited in the claim.

Regarding claim 20, the prior art fails to teach a combination of the steps of:
modulating the processed signals based on a type of the communication signal and then demodulating the modulated signals using one of a plurality of conversion processors to transmit the signals respectively to a corresponding user application, wherein each of the plurality of conversion processors is coupled to the main controller

and a corresponding user application, and wherein each of the plurality of conversion processors comprises a first demodulator/modulator configured to modulate a first type of communication signal provided from the main controller, a second demodulator/modulator configured to modulate a second type of communication signal provided from the main controller, and a third demodulator/modulator configured to modulate a third type of communication signal provided from the main controller, in the specific combination as recited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan D Nguyen whose telephone number is 571-272-3153. The examiner can normally be reached on M-F (7:00AM-4:30PM).
